

Punctureseal

Punctureseal is a unique liquid tyre sealant that continuously stands on guard to protect tyres of all shapes and sizes. If installed it will improve your fuel economy, extend the life of your tyre, and could save your life by preventing most punctures.

Benefits

- Improved fuel economy. (2% –6.5 %)
- 5%-37% longer tyre life.
- Puncture prevention = Driver safety.
- Reduced vehicle down time.
- 5 month return on investment.
- Product lasts the life of the tyre.
- Operates -40c to +150c

Researched and developed over 45 years, Punctureseal helps protect hundreds of thousands of customers worldwide from punctures and the costs inevitably associated with them.

Punctureseal comes in both a Commercial grade suitable for road vehicles, and a Extreme Heavy Duty (XHD) alternative for both road vehicles and large and off road vehicles.

How does it work?

When a tyre is punctured, Punctureseal is forced against the puncturing object, or into the wound it leaves. Special fibres entwine forming a clot. When exposed to outside air the seal hardens, becoming impervious to water, rain, snow and mud.

Punctureseal can be installed in :
