

Punctureseal (UK) Ltd.

September 2014

FAO Greg Skillman

**Re "Punctureseal" product you supplied.**

Greg,

I am writing a short note to confirm how well the "Punctureseal" has worked in our vehicles over recent months.

As you know we have applied it in a cross section of our fleet and it has been found to work well in combatting the inevitable deflation of tyres we suffer from working on unmade sites and disposal facilities.

We have found best use on our site vehicles here at our transfer station. As an example the site based fire engine we have which is used for damping down dusty areas on site has not had a "flat" since we applied the "Punctureseal".

We will continue to use the product as required and can recommend it in our application.

Regards

Rick Marson – Transport Manager – White Recycling Ltd.
